

# ARAPAHOE ROAD OVER BIG DRY CREEK

# Project Need and Current Conditions

- The bridge is well past it's prime and is starting to show signs of wear.
- Bridge deck is cracking
- The concrete on the deck underside crumbling
- Steel beams are starting to show wear

# Current Conditions

- Arapahoe Road narrows down from both directions before crossing the bridge

# Current Conditions

- Lack of adequate pedestrian facilities
- Staircase is the only access to Big Dry Creek Trail

# Proposed New Bridge Section

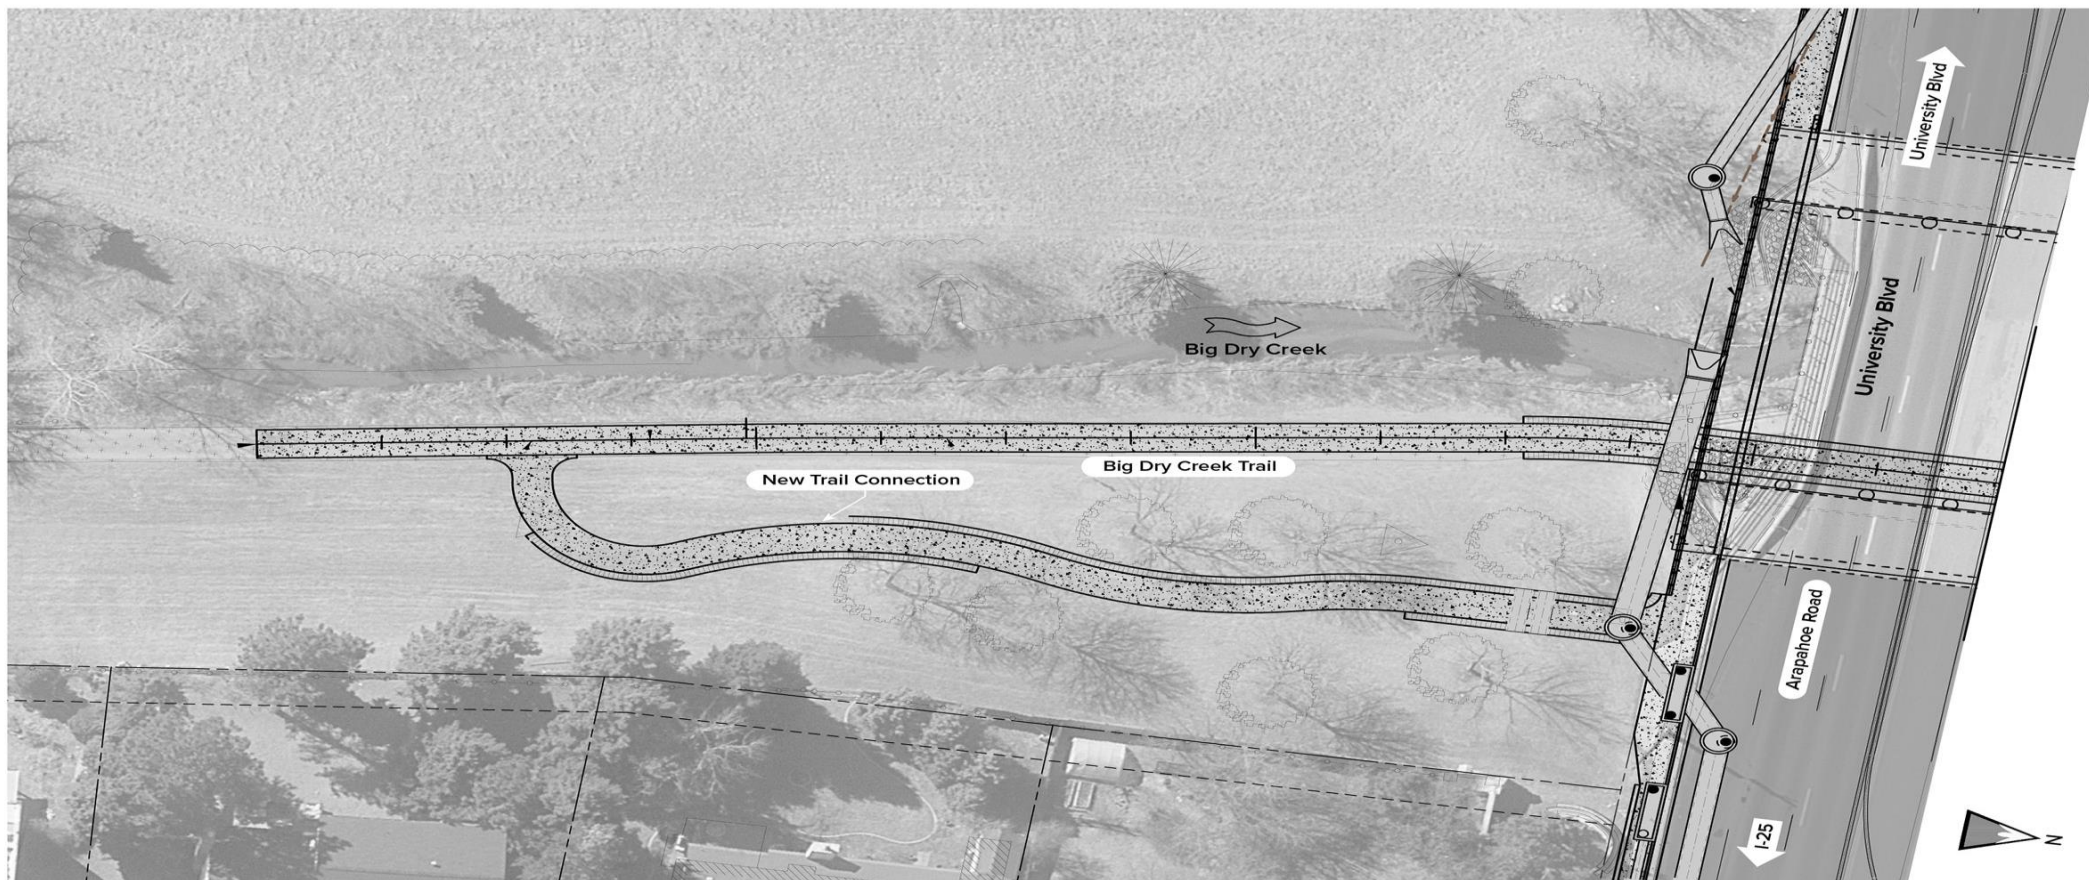

- Current median prohibits traffic access to the dual left-hand turn lanes, which causes backups on the insides through lane.
- The narrower median will allow earlier access traffic turning onto southbound University Boulevard.

# New Trail Connection to Big Dry Creek

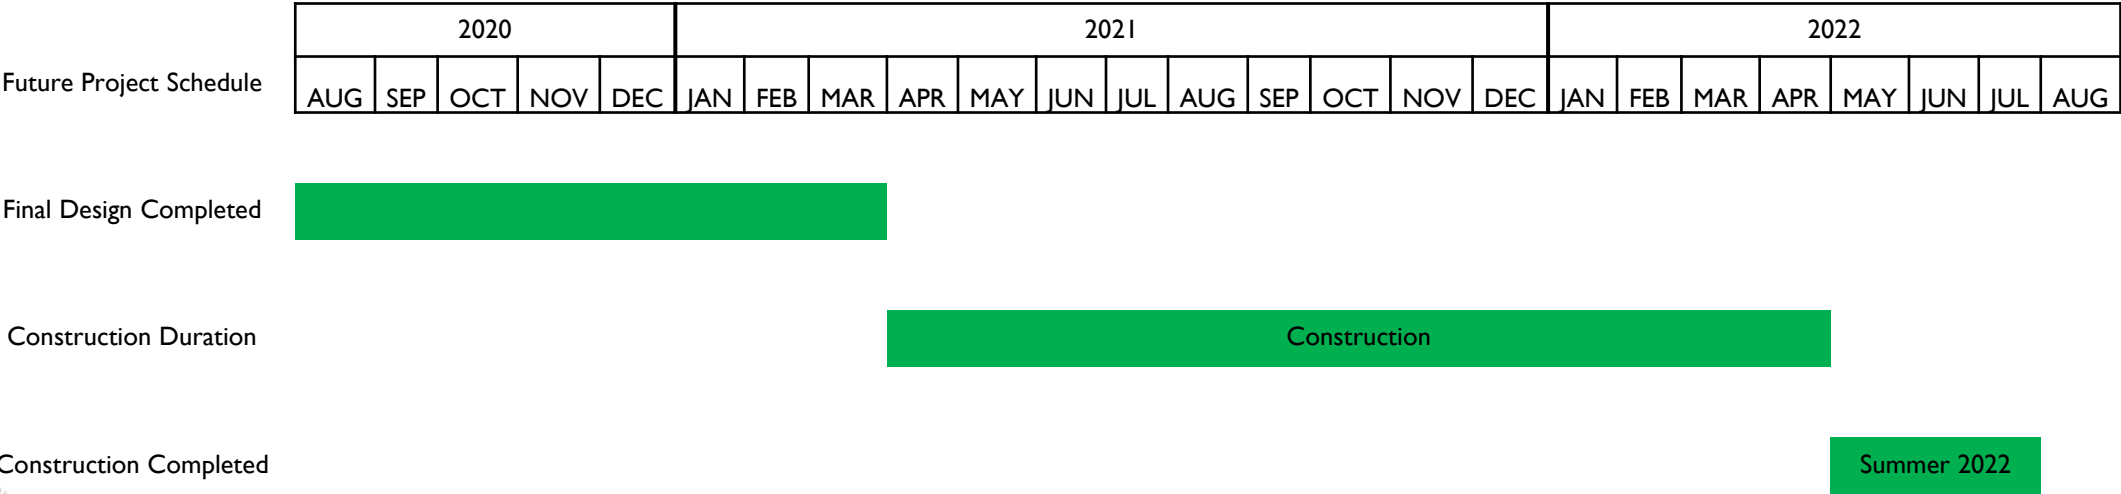

# Draft Rendering of Preliminary Design (subject to change)

# Project Schedule

# Next Steps
